The purpose of this project was to raise awareness, guide and motivate students of the College of Military Police of the State of Goiás - Unit José Carrilho, in the municipality of Goianésia / GO, working in teams, preserve through the environment through reuse and give an aesthetic more enjoyable associated with sustainability. The implementation of a project at school revolved around improving the environmental quality of the space, so the garden project aimed to leave the reception desk and a sustainable theme, as is the community entering the school, has a good Printing from school due to concern for the environment. The project was collaboration of Green Life project, run by the Cerrado People Association, sponsored by Petrobras, through the Petrobras Environmental Program. Therefore, it is important to develop such projects, and school should prepare citizens for a social life that are concerned and that emphasizes the environment.
